### Embroidery Instructions:

- Add this machine embroidery design to the jumpsuit front.
- Fleece or knits can be quite stretchy and this can influence your embroidery design. Iron on a 4"x4" square of fusible interfacing on the back to keep it nice and firm.  
**WARNING Note: Fleece:** Do not press the bottom of the iron directly on the fleece as it can cause damage. Use the point of your iron on the interfacing or use a pressing sheet or piece of paper over the pressing area.
- If your fabric has some "pile" like minky, then put a water soluble stabilizer over the top. The kind I use is of the plastic kind that I also use to embroider towels.
- Remove and cut away the excess interfacing at the back of the embroidery.
